## STATE OPERATIONS

A comparison - December 1940 to November 1940 and December 1939

Benefit Payments Continue to Drop

The amount paid to claimants for unemployment compensation during December (\$296,076.00) was the smallest of any month since July 1939 when payments totalled \$281,448.99. The December total comprised a drop of 37.38% from the previous month and a 2.36% decline from the December 1939 total.

Claims Received Drop Slightly

The 40,551 claims received during December lacked 2.91% of equaling the 41,768 filed during November. There was a marked increase in both initial and waiting period claims but the drop in compensable claims more than offset these gains to bring the total for the month to less than that of the previous month.

Agent State Claims Increase 24.47%

Increases in both initial and continued agent state claims received brought the total of these claims to 21,066 - 34.47% more than the 16,925 received during November. This increase brought the rise over the December 1939 total to 48.17%.

Liable State Claims Decrease 22.11%

The number of liable state claims filed during December showed decreases in both types (initial and continued) from the November totals. The total for all liable state claims filed during December was 4,149 - a decrease of 22.11% from the 5,327 such claims filed during November. The December total constituted a decrease of 22.08% from the December 1939 total.

Initial Determinations show a Change of Less Than 1%

The 3,645 initial determinations made during December constituted a decrease of .98% from the 3,681 such determinations made during November. There was an increase in the number of these determinations which allowed eligibility and a decrease in those which did not allow eligibility. Much of this change was due to the great number of eligible claims which were filed by the Tampa cigar workers. The December total was 28.08% less than that of December 1939.

Field Visits Drop 16.12%

The number of field visits made to prospective employers during December lacked 16.12% of equaling the November total. There was a decrease of 11.19% from the total for December 1939.

New Applications Decrease Sharply - Still High

Although there was a decrease of 39.11% from the November total of new applications there were 15,935 such applications for employment made during December.

Renewals Jump 108.08%

Due largely to the mass layoff of workers in the Tampa cigar industry and the resulting increase in the number of applications for employment and claims for benefits was the jump from 5,087 to 10,585 in the number of renewals.

Active File Decreases 6.48%

Partially as a result of the 39.11% decrease in the number of new applications made during December was the decrease in the active file from 76,481 in November to 71,526 in December. The December total was a decrease of 11.60% from that of December 1939.

Employer Orders Up 36.77%

The 4,839 employers orders received during December comprised an increase of 36.77% over the 3,538 such orders received during November. Since a decrease in the number of placements during the month accompanied the increase in employer orders it appears that the average order was for a smaller number of workers than was the case in November. Much of this apparent inconsistency (decrease in placements accompanying an increase in orders) was caused by orders for workers for Camp Blanding.

Placements Decrease 16.47%

A decrease of 16.47% in the number of placements (December over November) brought the total from 17,068 to 14,257. Here again it appears that the large decrease in the number of placements made at Camp Blanding is mainly responsible for the fluctuation. Despite the decrease from November the December total of placements was abnormally high as is indicated by the fact that it exceeds the December 1939 number of placements by 140.54%.

Claimant Placements Decrease 23.66%

With the decrease in the total number of placements during the month there was also a decrease in claimant placements from 1,044 to 797. The December total, in this case, represents an increase of only 4.87% over the December 1939 total.

Veteran Placements Increase 8.79%

Despite decreases in total and claimant placements there was an increase of 8.79% in the number of veterans placed in jobs during December. This total exceeds that of December 1939 by 132.14%.

Agricultural Placements Show Little Change

The decrease from the 27 agricultural placements made in November to the 26 made during December was not significant.

December Total of Benefit Payments Reaches New Low for 1940

The \$276,096.00 paid out in benefits during December comprised the lowest total for any month of 1940. The inclusion of the December payment amount brought the 1940 total to \$6,353,112.45 and the total for the entire period of operation (from February 1, 1939, through December 31, 1940,) to \$9,857,224.58.

BENEFIT PAYMENT AMOUNTS - FEBRUARY 1939 THROUGH DECEMBER 1940

\*DOES NOT INCLUDE LIABLE STATE CLAIMS

The two tables presented above constitute a recapitulation of the several types of claims filed in the local offices during the year of 1940 and the number and amount of benefit payments made during the year. There were 893,944 claims (of all types) taken in Florida and 675,804 checks for a total of \$6,353,112.13 issued to Florida and multi-state claimants during the period.

\* REVISED TO NOVEMBER 1940

CHANGES IN STATUS OF THE FLORIDA UNEMPLOYMENT COMPENSATION FUND DURING 1939-1940  
(BENEFITS FIRST PAYABLE FEBRUARY 1, 1939)

MILLIONS  
OF DOLLARS

EXPLANATION OF GRAPH:

1. THE DARK RECTANGLE FORMING THE BASE FOR THE REST OF THE CHART REPRESENTS THE COLLECTIONS WHICH WENT INTO THE FUND DURING 1937 AND 1938. THERE WERE NO BENEFIT PAYMENTS DURING THIS PERIOD.
2. THE SHADED AREA (JUST ABOVE THE FUND BALANCE) REPRESENTS THE CUMULATIVE EXCESS OF COLLECTIONS OVER BENEFIT PAYMENTS.
3. THE LIGHT PORTION (AT THE TOP) REPRESENTS THE AMOUNT PAID OUT IN BENEFITS. AT FIRST GLANCE IT MIGHT SEEM THAT THE BALANCE IN THE FUND AMOUNTS TO ABOUT 21 MILLION DOLLARS; CLOSER SCRUTINY WILL REVEAL THAT THIS IS ACTUALLY THE TOTAL AMOUNT COLLECTED. FROM THESE COLLECTIONS MUST BE DEDUCTED BENEFIT PAYMENTS, IN ORDER TO ARRIVE AT THE NET BALANCE IN THE FUND.

Placements Total 14,257 for December

There were 14,257 complete placements made during December with 7,413 of them being at Camp Blanding. The next largest concentration of placements was in the Tallahassee local office serving the Air Base Project in that area. There were 857 placements made in the Tallahassee area with practically all of them being on the defense project. The Blanding placements are treated separately in this Bulletin but those made at Tallahassee are included in the state-wide figures.

Tampa reported the largest volume of private placements followed by Miami. Large volumes of citrus placements were reported by Winter Haven, Orlando and Lakeland. Jacksonville reported 422 complete placements exclusive of Blanding with 405 being in private employment.

Trade industries led all other establishments in private employment during December hiring 2,153 persons. Manufacturing establishments accounted for 1,225 private placements with approximately 67% being women. Exclusive of Camp Blanding the construction industry hired 1,935 employment service applicants but this figure included the large volume reported by Tallahassee. Approximately 86% of the total placements reported outside of Blanding were in regular employment.

Unskilled workers, consisting largely of construction laborers, accounted for 2,450 placements to represent the largest occupational group. Service workers represented the largest private placement group with 1,528. This is accounted for by the increase in activity in all service industries resulting from the beginning of the tourist season. Agricultural and kindred workers accounted for 1,081 placements and represented for the most part workers in the citrus industry through the central part of the State.

There were 376 complete clearance placements and seven Civil Service placements made during December.

Decrease Recorded In Active File and New Applications

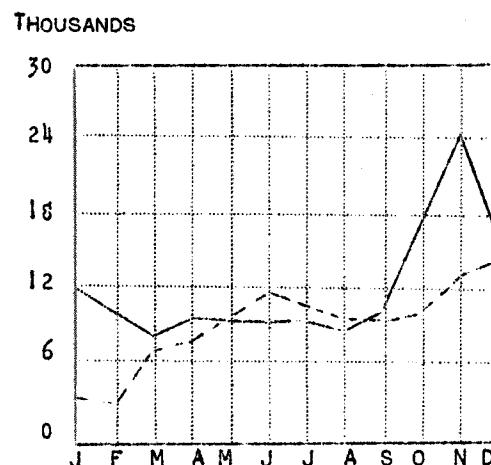

The number of active registrations for employment fell approximately 5,000 during December leaving the recorded active file at 71,526 at the end of the month. A similar decrease is shown in the Jacksonville figures for this period. These figures include the file at Camp Blanding with a total change for the area from 16,489 to 11,319. The Tampa file showed a sharp increase over November as a result of mass layoffs in the cigar manufacturing industry which sent cigar workers to the office to file new or continued claims and renew their registrations for work. The total file for the Tampa area including the colored office was the largest in the State at 13,573 followed by Jacksonville. Miami, with an influx of workers from the North, reported the next largest active file with 9,811, representing only a slight drop from November.

Jacksonville continued to receive the most new applications reporting 6,489 during December. This figure represented little more than one-third the number filed with the office during the previous month. Tallahassee, where the Air Base Project is now in progress, took 1,222 new applications during the month representing a slight increase over the 1,001 taken in November.

## VETERAN ACTIVITIES

Veteran placements for December continued on the upward trend of the past few months. As was the case for November, December topped all previous months. During the month 260 veterans were placed in job openings. The recent trend is indicated by the fact that 48% of the placements for the year were made during the last three months of 1940. The largest number of December placements was made by Jacksonville, Tallahassee, Miami, and Tampa - offices which served defense projects.

New applications and renewals decreased slightly from the November figure while cancellations increased 41%, showing a negative change of 11% in the active file.

During the calendar year 1940, 1,188 veteran registrants were placed in 1,474 different jobs. This means there were 80.6% as many veterans placed as jobs filled by veterans.

By way of comparison, 56,483 registrants (both veteran and non-veteran) were placed in 67,101 different jobs during 1940. The number of registrants placed amounted to 84.2% of the jobs filled.

## DECEMBER ACTIVITY AT CAMP BLANDING

Large scale placement activities continued at Camp Blanding through December with 7,413 jobs being filled. This figure represents a decrease of approximately 4,000 from November when the peak was reached on this project. Many of the placements being made at Blanding now are replacements resulting from completion of various units of work and beginning of other units. Even with these seven thousand placements for the month the employment figure remained at the same peak of approximately 20,000.

There were 2,103 construction carpenters and 185 finish carpenters among those placed during December. Construction laborers, however, accounted for the largest group of placements totalling 3,760 for the month. There were 56 sheet metal workers and 22 structural steel workers placed during the period. There were also 127 cement finishers among the skilled workers placed. The largest single group among the semi-skilled workers placed was truck drivers which group accounted for 288 of the placements.

Approximately 70% of the persons placed in December were white. There were only 59 claimants and 79 veterans among the 7,413 total. Approximately 45% of the applicants were between 21 and 35 years of age with the modal group falling between 25 and 29 and representing 1,249 placements. There were 73 placements of persons whose age was given as 65 or over and 41 youths between 16 and 17.
